

New or old natural stone, terrazzo, and concrete floor surfaces can be ground to a high-gloss finish. By combining the cutting edge technology of diamond grinding with propane power, we have established new standards in floor refinishing.

PACKAGE A

Suitable for warehouses and shops with concerns of durability and cost efficiency. Customer is not concerned with grinding of edges/corners, and around equipment or racking.

- complete coating removal and diamond leveling of surfaces
- application of an impregnating concrete hardener

Finished Floor: durable, flat shine, and easy to maintain floor surfaces that are very affordable and will last for many years.

PACKAGE B

- complete coating removal and diamond leveling of surfaces
- application of an impregnating concrete hardener
- 2 polish steps

Finished Floor: smooth, durable and easy to maintain floor surfaces that cost less than conventional floor coatings and have a low shine that will last for many years

PACKAGE C

- complete coating removal and diamond leveling of surfaces
- application of an impregnating concrete hardener
- 4 step polishing

Finished Floor: high gloss, smooth, durable and easy to maintain floor surfaces that cost less than conventional floor coatings and have a high shine that will last for many years - this system can transform most old worn concrete, terrazzo floors into showroom quality

PACKAGE D

- complete coating removal and diamond leveling of surfaces
- application of an impregnating concrete hardener
- 6 step polishing

Finished Floor: These floors are incredible. The D series floors are far more durable than any floor coating or overlay system on the market. In addition the Evershine package D is less expensive than the majority of epoxy and urethane coatings.
